

Performance and efficiency come together in the Eaton 9PX UPS.

As an industry professional, and because of rising energy costs and the business need for energy-efficient performance, you'll be looking for ways to reduce costs and consumption. The Eaton 9PX UPS enables you to secure all your mission-critical applications, giving you the reductions in energy usage and costs you need.

Eaton 9PX UPS key benefits.

- Constantly monitors power conditions and regulating voltage and frequency
- Up to 95% efficiency in online double conversion mode and 98% in high-efficiency mode
- 0.9 power factor delivers 28% more power than UPS in its class
- Compact rack/tower versatile form factor, delivering up to 5400W in only 3U and 10kW in only 6U

Essentially, the Eaton 9PX UPS gives you the chance to optimise power density and minimise capital and operating expenditure, along with the assurance that, should the power go down, critical processes will be maintained in your IT infrastructures and other applications.

Features that set the Eaton 9PX UPS apart.

- New graphical LCD display provides clear information on the UPS's status and measurements on a single screen which tilts 45° for ease-of-viewing
- Metering energy consumption kWh values can be monitored using the LCD or our own Intelligent Power® Software Suite
- Availability and Flexibility The internal bypass allows service continuity in case of internal fault, a maintenance bypass is also available for easy replacement of the UPS without powering down critical systems
- Paralleling functionality to achieve twice the power of unitary products using Hot Sync technology
- Load segment control enables prioritised shutdowns of nonessential equipment to maximise battery runtime for critical devices (5 and 6kVA UPS)
- Serial, USB and relay connectivity, plus an extra slot for an optional communication card
- Intelligent Power® Software Suite compatible with all major OS including virtualisation software such as VMware and Hyper-V is included with each UPS
- Eaton ABM® battery management technology for longer battery life
- Plus, add more runtime with up to 12 external hot-swappable battery modules, able to run systems for hours if necessary

Eaton innovating for more than 50 years.

Eaton has been safeguarding the critical systems of businesses across the globe for over half a century. Whether protecting a single desktop or the largest data centre, Eaton solutions provide clean, uninterrupted power to keep mission-critical applications working.

We offer a comprehensive range of environmentallysensitive, efficient, reliable UPSs, surge protective devices, power distribution units (PDUs), remote monitoring, meters, software, connectivity, enclosures, airflow management and professional services.

As the ultimate protection for your IT equipment, the Eaton 9PX UPS also integrates seamlessly into all major virtual environments including VMWare, Hyper-V, Citrix XenServer, RedHat KVM. With Eaton you are sure to benefit from the best of virtualisation technology.

Eaton 9PX UPS Technical Specifications.

- 1 Remote Off/On and Remote Power Off connectors
- 2 Slot for Network-MS, ModBus-MS or Relay-MS cards
- 3 Parrallel operation port (DB15)
- 4 External battery module (EBM) connector with automatic detection (RJ11)

Eaton 9PX 6kVA

- 5 8 IEC 10A sockets (2 groups of 4 manageable sockets) with cable retention system
- 6 2 IEC 16A sockets with cable retention system
- 7 DB 9 with output contacts
- 8 USB and serial ports
- 9 Input/Ouput connection
