

E Series DX Uninterruptible Power System

Reliable Power Protection for Today's Computing Environments

Introducing the E Series DX UPS

The E Series DX UPS double-conversion online UPS from Eaton® affordably protects mission-critical applications from downtime, data loss and corruption. The double-conversion architecture incorporates rectifier and inverter stages to completely isolate the output power from all input anomalies. By adapting to a wide range of input voltages, the E Series DX avoids battery usage during minor power fluctuations, saving its capacity for times when utility power is completely lost.

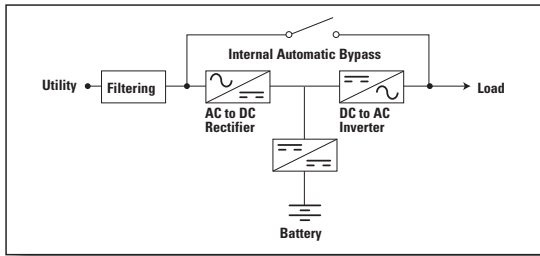

Features

- Online double-conversion topology assures maximum reliability
- Wide input voltage range appropriate for the harshest electrical environments
- Standard models for fixed run-time performance
- Tested for generator compatibility
- Automatic bypass for fault tolerance
- Optional SNMP communications provide remote network-based monitoring
- XL models for customized, long run time applications, with fast recharging
- Cold start-on-battery power allows portable power
- WINPOWER software monitors power conditions
- Intuitive front-panel user interface for consistent status indication

Product snapshot

Power Rating:	1 kVA–20 kVA
Voltage:	60 to 138 VAC (low voltage) 80 to 300 VAC (high voltage)
Frequency:	50/60 Hz (auto-sensing)
Technology:	High-frequency double-conversion online

Online double-conversion topology

This topology guarantees a consistently high level of power quality. Any disturbances on the distribution waveform are regenerated via the AC to DC then DC to AC conversion process. The battery is used only as a backup source.

High performance and reliability

DX uses High Frequency technology to bring its users a compact UPS that delivers perfect sine wave output.

Wide input voltage range

DX UPS have a very wide input voltage range of up to 120-300V, optimized to improve compatibility with engine generator sets and reduce the numbers of transfer to battery power. The batteries are used only for the most serious incidents, maximizing available back-up time and extending battery life.

Automatic bypass

In case of overload or UPS fault, the DX UPS automatically transfers the load to utility AC power.

Advanced communications

An RS232 port is available for easy connection of the UPS to the server. It may be used for local monitoring. An optional SNMP card is also available for network administration.

WINPOWER monitoring software can be used to:

- Alert users of a power event or pre-specified condition
- Automatically shut down your servers
- Remotely supervise and control UPS solutions

High-performance battery charger

The DX battery charger:

- Reduces battery recharge time
- Protects the battery against damage caused by deep discharge
- Prevents disturbances on the distribution system by correcting the power factor
- Avoids propagating faults on the distribution system (back-feed protection)

Cold start-on-battery power

This function ensures trouble-free start-up of your applications even during a utility power outage.

Backup times from five minutes to several hours

DX UPS offers a standard backup time of five to eight minutes on full load to protect the applications. XL models allow users to reach several hours of runtime using external batteries.

E SERIES DX BATTERY RUNTIME CHART

Technology

Online double-conversion IGBT with micro-controller

Input / Output

Nominal Input Voltage	115V (Low-Voltage Models) 220V (High Voltage Models)		220V (All Models)		380 / 220 Vac three-phase			
Input Voltage Window	60V to 138V (Low Voltage Models) 122V to 300V (High Volt)		185V +/- 3% to 266 +/- 3% (Low Volt) 122 to 300V (High Voltage Models)		20% / -25%			
Nominal Output Voltage	115V (Low-Voltage Models) 220V (High Voltage Models)		240V / 120V (Low Voltage Models) 220V (High Voltage Models)		220V			
Output Voltage on Battery	115V (Low-Voltage Models) 220V (High Voltage Models)		240V / 120V (Low Voltage Models) 220V (High Voltage Models)		220V			
Frequency	50/60Hz, auto-detection							
Data Line Protection	Input / output jacks included for telephone / modem / internet line surge protection						N/A	
Output Receptacles (High Volt)	4 IEC style (two output cables included)				Hardwired			
Output Receptacles (Low Volt)	4 NEMA 5-15 style		6 NEMA 5-15 style		Hardwired			
Input Connection (High Volt Models)	IEC 10A style, for use with computer power cable		IEC 16A (IEC 16A cable included)		Hardwired			
Input Connection (Low Volt Models)	IEC 10A style, for use with computer power cable		Standard Model: Attached L5-30 input plug (cable included) XL Model: Hardwired		Hardwired			

Battery

Battery Quantity (Standard Model Only)	3	4 (1500 Low voltage) 8 (2000 High voltage)	8	20	User-Supplied External Battery			
Charge Capacity (Standard Model Only)	Five hours to 90% (LV 1K-3K std.) / 7 Hrs to 90% (LV 6K std.) / Eight hours to recover 90% capacity (LV 10K and HV models std.)				User-Supplied External Battery			
Battery Monitoring (Standard Model Only)	Battery replacement indicator				User-Supplied External Battery			
Start-On-Battery (Standard Model Only)	Unit can be started without being connected to AC utility power -- allows for portable power source				User-Supplied External Battery			

User Interface

Visual	Operation on mains, battery, inverter, bypass and load/battery-charging levels							
Alarm and Controls	Battery Operation Mode, Low Battery, General Fault, Overload, On Bypass							
Audible and Visual Alarms	Battery Operation Mode, Low Battery, General Fault, Overload, On Bypass							
Control	Two buttons for On/Off and Alarm Silence							

Communications / Management

Power Management Software	WINPOWER power management software, included on CD							
Connection Type	Standard RS232							
SNMP Interface	Optional SNMP card							
Environment								
Operating Temperature	0°C - 40°C							
Humidity	<95%							
Noise Level	<45dB (LV 1K-1.5K) / <50dB (others)		<55dB		<60dB			
Standards								
Certification	CE, UL (Low Voltage: 1K-3K only), ISO 9001
